EVALUATION OF TEACHING

PRESENTER: Austin Herzog

PRESENTATION TOPIC/TITLE: Vitamins, Minerals, Prebiotics, and Probiotics

AUDIENCE/COURSE: First Professional Year PharmD Students in PHRM 826: Introduction to Patient-Centered Care

DATE OF ACTIVITY: 10/24/24 TIME: 7:30-9:20am EVALUATOR: Jamie Woodyard, PharmD, BCACP

TEACHING MODALITY: ○ Lecture ○ Small Group Presentation ○ Small Group Facilitation

Competency	Outstanding Performance 5	Meets Expectations 4	Needs Some Improvement 3	Needs Significant Improvement 2	Unsatisfactory Performance 1	Not Observed
Objectives	○ All objectives are clear and use measurable defined terms (e.g., list, identify, contrast, compare). Objectives encompass a variety of action verbs. Appropriate number of objectives for length of presentation.	◉ Most objectives are clear and measurable. Little overlap in objective action verbs. Number of objectives reasonable for length of presentation.	○ Most objectives not measurable and clear. Objectives overlap in action verbs. Number of objectives somewhat inappropriate given length of presentation.	○ Majority of objectives not measurable or ill-defined. Little difference in objective action verbs. Number of objectives inappropriate given length of presentation.	○ No objectives defined	○
Content	○ Level appropriate. Incorporates clinical or other applications. Accurate and reliable information consistently presented. Questions answered consistently and appropriately	◉ Presentation mostly level appropriate. Many applications highlighted. Most information is accurate and reliable. Questions answered well.	○ Some content is not level appropriate. Applications not consistently demonstrated or highlighted Questions not answered completely or accurately.	○ Majority of content is not level specific. Applications not demonstrated or highlighted. Questions not answered completely or accurately	○ Content is not level appropriate. Applications unclear. Inaccurate information communicated. Questions not addressed or answered with incorrect information.	○
Organization	◉ Organized, logical flow. Concise discussion. All statements interconnected. Major points highlighted completely.	○ Majority of presentation flows logically. Most major points highlighted.	○ Difficult to follow all thoughts. Some ideas not well interconnected. Major points sparsely highlighted.	○ Majority of content is difficult to follow. Facts presented with little connections to topic or objectives. Major points not highlighted.	○ Disorganized. Content does not flow in any logical manner. Major points are not evident in any way.	○
Delivery	○ Audible, good enunciation, rate, and tone. Proper pronunciation and use of terms. Poised, polished. Presentation appears extemporaneous. Starts and end on time.	◉ Consistently audible, rate and tone are appropriate. Few distractions. Handout used as reference only.	○ Some words lost to mumbling. Rate and tone sometimes slow/fast. Somewhat rehearsed.	○ Difficult to hear and pace. Words mispronounced. Pace difficult to follow. Presentation sounds rehearsed. Starts and/or ends more than 3-5 minutes late.	○ Unable to hear or keep pace with presentation. Distracting mannerisms. Presentation read from handout. Starts and/or ends more than 5-10 minutes late.	○

Teaching Skills	○ Able to consistently and clearly communicate teaching points and instill critical thinking in learners. Actively works to improve skills by engaging in various teaching activities.	◉ Effectively communicates almost all material being taught. Usually elicits critical thinking. Works to improve teaching skills.	○ Generally able to communicate teaching point. Requires some assistance from preceptor. Rarely engages in teaching activities.	○ Frequently unable to effectively teach. Creates more ambiguity in the learner than understanding. Does not seek out teaching opportunities.	○ Consistently avoids teaching. Unable to communicate points without causing confusion. Never focuses on critical thinking skills. Does not seek opportunities to improve skills.	○
Professionalism	◉ May serve as a role model for students. No deficiencies in attendance, punctuality, or dependability	○ Generally seen as an appropriate role-model for students. All behaviors are appropriate.	○ Occasional behaviors not consistent with expectations.	○ Behavior is often inappropriate and unprofessional.	○ Behavior is disruptive or antagonistic. Unexcused absences. Blatant disregard for professional attributes.	○
Handout (Please attach handout)	○ Handout is used to augment presentation. Handout is clear and without typographical or spelling errors.	○ Handout somewhat augments presentation. Handout is mostly clear and without error.	○ Handout sometimes detracts from presentation. Some typos or spelling errors exist.	○ Handout is difficult to follow and distracts listener. Many errors detected.	○ Handout completely detracts from presentation. Handout is laden with errors or is unable to be read.	◉
Audiovisuals	◉ AV's are used which augment presentation. AV's are clear and without typographical or spelling errors.	○ AV's somewhat augment presentation. AV's are mostly clear and without error.	○ AV's sometimes detracts from presentation. Some typos or spelling errors exist	○ AV's are difficult to follow and distracts listener. Many errors detected	○ AV's completely detract from presentation. AV's are laden with errors or unable to be read.	○

COMMENTS:

Strengths:

-Warm introduction encouraging students to stop by PUP and speak with you
-Informing the class exam questions will come from learning objectives (and also putting this into action I assume!)
-Use of analogies to illustrate concepts (e.g. filling bucket with water and it overflowing to describe water-soluble vitamin saturation)
-Nice job connecting/revisiting concepts (e.g. mentioning vitamin K's role in coagulation at the beginning and then revisiting this later, reminding students you had mentioned this before)

Specific suggestions for improvement:

-I like how you spoke primarily from the center of the room, as I think this provides the best view for students, especially for any who may be hard of hearing and rely on reading lips. You might consider getting or using a clicker to advance the slides as it was slightly distracting that you had to walk back to the computer each time a slide needed to be advanced
--Consider looking at large screens at the front of the room less frequently as this results in turning your body away from students. This may also result in audio becoming quieter if the microphone is hooked on clothing; however, because you held the microphone and moved it when you turned your head/body, the audio volume was consistent throughout.
-Consider speaking a bit louder or turning the microphone volume up. This improved the second half of class.
-Recommend differentiating between "toxicities" and "side effects". At times these seemed to be used synonymously (e.g. flushing from niacin as a "toxicity"), but they may be different. In
